

NMIT's Aviation programmes offer training that provides you with a gateway into an exciting and rewarding career in aircraft maintenance.

NMIT aviation engineering student

If you have an interest in aircraft and enjoy repairing and maintaining engines, have an eye for detail and love a technical challenge, then a career in aviation is a great option. NMIT is one of only two aircraft engineering trainers in New Zealand.

NMIT is New Zealand's first approved NZCAA Part 147 Certified Maintenance Training Organisation.

*"It felt so good to go straight from graduating to full-time work because it's such a competitive industry. I couldn't have got here without my NMIT qualification. It's a really rewarding career, I'm just really glad I decided to follow this path. It's opened a lot of doors - I feel like I could go anywhere."*

- Paul Pudney graduated with a Certificate in Aeronautical Maintenance Engineering

### **Tour our campus at the Woodbourne RNZAF base**

NMIT's Aviation programmes offer training that provides you with a gateway into an exciting and rewarding career in aircraft maintenance. Take a tour with us of the Woodbourne RNZAF base campus where learning mixes with culture and precision instruments.
